# Products and services

## ID Solutions

Identisys secure ID solutions are as powerful as they are functional and effective image branding; our solutions capitalize on smart cards, biometrics, laser engraving and other advanced technologies. Our digital photo ID systems are so affordable and easy to use that schools, retailers, hospitals, hotels and other small- to mid-sized organizations use them for everything from employee IDs, hotel keys, loyalty and retail gift cards to national citizen IDs.

## Card Delivery Systems

Identisys inline and stand-alone card delivery system provide card issuers with easy one-to-one marketing, cost reduction and efficiency gains. Businesses of all types, governments and other security-conscious organizations have made Identisys the region's preferred choice of secure ID solutions. Identisys' product line is unrivalled to other service providers in East Africa. We are exclusive distributors of FARGO products from HID Global® and Magicard® ID Card Printers.

## Support

Identisys helps customers get the most out of their card programs. We provide training and full technical support, including on-call and on-site maintenance and depot repair at our warranty center. Our onsite card issuance service is a turnkey service. We provide the equipment, supplies and even the personnel, to capture images and produce cards at your location. Some use our services for mass issuance during peak periods. Others rely on us to manage their ongoing card issuance throughout the year.

## Supplies

Identisys only carries 100% original equipment manufacturer (OEM) approved supplies and accessories.

## Facts about Identisys

- Identisys' secure ID solutions are used to issue thousands of financial and identification cards every year in East Africa.
- Identisys makes mass issuance of cards economical. Our high-volume card issuance system outsells all other brands.
- Identisys supplies many of the largest card programs in Kenya, Tanzania, Uganda and South Sudan.
- Over the past ten years, Identisys has provided secure ID solutions and superior services to more than 250 satisfied customers.
- Identisys knows the industry. We have more than 19 years combined experience in the card solutions and identification market.

# Why choose Identisys secure ID solutions?

## Smart solutions

Identisys integrates all elements of your card program, including visual identity, access control and secure access to PCs, networks and databases. Our secure ID solutions include: Detailed needs analysis, Program planning and implementation, Card design, Enrollment and ID card issuance, and Full technical support. Identisys can handle the entire process for you, or collaborate with your security and IT staff to develop the best possible solution.

## Security and functionality

Identisys knows secure identity better than other providers in the market, because we have implemented and refined the most important secure identity technologies used today. We can explain all available card security features, including new printing techniques, overlay and topcoat options and smart card security measures. In addition to explaining your options, we can advise you which one best suits your needs.

## Innovation

Identisys introduced digital photo ID systems nine years ago and set new standards for corporate and government ID programs in East Africa. We also introduced the first e'purse smart cards in Uganda. Our exclusive product line is continuously renewed in concordance with our customers' requirements and changes in the market.

## High quality

Identisys' professional partners manufacture cards in respect of the latest security and environmental standards, and our cards are tested in order to comply with international quality regulations.

## Cost saving

Identisys can help you to greatly simplify card issuance and enrollment and cut capital costs in the process. An example is our onsite card issuance service. We can show you how Identisys secure ID solutions have made other large enterprises more productive and cost-efficient by changing from film-based IDs and non-secure cards to secure technology cards.

## Fast & friendly service

Identisys has a well-established network of distributors and resellers. We distribute throughout East Africa. We pay particular attention to give our customers the best possible service and we provide fast and friendly after-sales service, in the same spirit.

*Identisys is our trusted partner. While anyone can make cards, Identisys made our cards attractive, smart and secure. They helped us assess our needs and choose the right model. In the end we saved time and money by outsourcing our card program to Identisys.*

- COO, ABC Bank, Kenya

*Identisys provided us with a complete solution that made our transition from paper based to card based membership smooth and secure. It has helped us profile our image better and proven to be extremely reliable.*

- CEO, Flying Doctors' Society of Africa

**Identisys secure ID solutions for businesses of all types, governments and security-conscious organizations**

Our solutions are used by security companies, schools and universities, hospitals, hotels, casinos, governments, industries, retail and insurance, airlines, clubs, associations and many more.

You can use Identisys card solutions for everything from employee badges, patient ID, welfare and insurance ID, frequent flyer and membership cards, events and room keys to loyalty and retail gift cards.

No matter how your card program is configured or if you are looking to introduce a new program, our secure ID solutions are powerful, functional and cost-effective for you.
